

## Special Issue

# Control, Diagnostics and Protection for Electrical Machines, Power Electronics and Drives

### Message from the Guest Editors

The modern era of electrification and energy efficiency relies heavily on advanced power conversion systems, including electrical machines, power electronics and drives. These technologies form the backbone of industrial automation, power generation, renewable energy integration, transportation electrification, and more. However, as their adoption increases, so too do challenges in ensuring optimal performance, reliability and fault tolerance. This Special Issue focuses on recent advancements in control strategies, diagnostic and protection methods for electrical machines, power electronics and drives. Contributions to this collection will address state-of-the-art research on robust control techniques, including adaptive, predictive, and intelligent control strategies for electrical machines and drives. Papers are also invited on innovative diagnostic tools for condition monitoring, fault detection, protection mechanisms and predictive maintenance. The role of electronics in ensuring system reliability and safety will be a key focus, particularly in the development of protection strategies that can respond dynamically to system anomalies.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
