

Special Issue

5G Technology in Smart Manufacturing

Message from the Guest Editors

Communication systems are the backbone of the factory of the future. In this context, digitization and networking are taking on an increasingly important role for manufacturing companies to make their production processes more flexible and at the same time more robust, ultimately with the vision of a resilient factory. 5G has the potential to become an important factor because of the ability to wirelessly connect multiple assets in factories and at the same time guarantee them a determined quality of service (QoS). Ultra-reliable low latency communication (URLLC) is of particular importance in this context. To further develop the 5G ecosystem, additional R&D efforts are required to make industrial 5G devices marketable and to validate their performance in corresponding use cases. Furthermore, the integration of 5G networks into the industrial LAN and the interaction with edge-cloud systems is of high importance. The coexistence of public and non-public 5G networks also needs to be investigated. Therefore, this Special Issue covers essential aspects of current research topics on the use of 5G in production.

Guest Editors

Prof. Dr. Robert Schmitt

Laboratory for Machine Tools and Production Engineering (WZL), RWTH Aachen University, 52074 Aachen, Germany

Dr. Joachim Sachs

Ericsson Research, Stockholm, Sweden

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
