

## Special Issue

# Recent Advanced Technologies and Applications of Smart Computing and Cyber Security

### Message from the Guest Editors

Today, smart computing has become a part of our daily life, where advanced computational methodologies and technologies both become too complex and sophisticated. The explosive growth of smart computing and the various technological advancements create many scientific and engineering challenges that call for ingenious research efforts from both academia and industry. In the digital era, cybersecurity is a part of our day-to-day life to protect systems, networks, and programs from digital attacks. We are inviting submissions that explore the defensive tools and mechanisms that deal with cybersecurity and at the same time assess exposure to cyberattacks and that promote a tradeoff between security, costs, and usability that is more aligned with the public interest. Both theoretical and experimental studies are welcome, as well as case studies, papers dealing with the systematization of knowledge, and survey papers. This Special Issue is to bring together scholars, professors, researchers, engineers, and administrators resorting to state-of-the-art technologies and ideas to significantly improve the field of smart computing and cybersecurity

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
