# Advances in Intelligent Data Processing and Modeling

### Message from the Guest Editors

In the era of generative AI and large models, data has become a crucial element, especially during the modeling phase. The ability to process and analyze large-scale datasets is instrumental in developing highly effective and robust models. Topics of interest include, but are not limited to, the following:

- Data preprocessing: data imbalance, missing data, and data augmentation;
- Data modeling;
- Computer vision and image processing;
- Natural language processing and understanding;
- Recommender systems;
- Information retrieval and ranking systems;
- Large language models;
- Generative AI;
- Graph neural networks;
- Medical AI and clinical decision-making;
- Trustworthy AI: security and privacy;
- Large online platforms;
- Real-world ML applications;
- Machine learning systems.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
