

## Special Issue

# Visible Light Communication and Positioning

### Message from the Guest Editor

Visible light communication (VLC) is an emerging area, and is extensively attracting interest from both academia and industrial fields. The potential large transmission bandwidth makes it a good candidate for future 5G/6G indoor communication networks. Due to the electromagnetic silence and limited transmission bandwidth characteristics, it is competitive for certain special applications. Moreover, due to the limited transmission and interference range, visible light media can be adopted for high-accuracy indoor positioning. Thanks to the recent developments of light emitting diodes (LEDs) and photoelectric conversion devices, low-cost communication system can foresee the wide deployment in daily use. Despite the abovementioned potential and recent great progress, there are still a number of open research issues that remain to be solved. As one of the interdisciplinary technologies, VLC will cover optical antenna design, physical-layer transmission aspects, MAC and network layer protocols, as well as system integration and miniaturization. Welcome to contribute.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
