# Advances in Signal Processing for Wireless Communications

## Message from the Guest Editors

The digital transformation of humanity has launched the massive growth of wireless connectivity. Business processes and our daily life are becoming increasingly dependent on communication facilities; thus, there is an ever-increasing demand being placed on the capabilities of wireless communication networks. The rapid progress of microelectronics, materials, and manufacturing facilitates the development of complex wireless architectures that require advanced signal processing algorithms to exploit the potential of novel technologies. The purpose of this Special Issue aims to highlight the newest developments, disruptive ideas, and practical results in signal processing for nextgeneration wireless communications. It includes, but is not limited to, narrow-band, spread-spectrum, multicarrier, and ultra-wideband modulation schemes. equalization and synchronization, advanced multipleaccess, cross-layer and heterogeneous solutions. distributed and coordinated transmission schemes, detection, sensing, and localization. You are welcome to contribute!!!

## **About the Journal**

## Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

## **Author Benefits**

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
