

## Special Issue

# Advances in Integrated Photonics: Technologies, Devices and Circuits

### Message from the Guest Editors

We are inviting submissions to this Special Issue, entitled *Advances in Integrated Photonics: Technologies, Devices and Circuits*. This Special Issue aims to publish high-quality research on integrated photonics utilizing the properties of photon–light or photon–electron interactions. Integrated photonics is believed to overcome the limitations of conventional electronics in terms of speed, capacity and functionality. This Special Issue confronts the fundamental principles, cutting-edge research investigations, and recent advances in integrated photonics materials, devices, circuits and their process technologies. We encourage theoretical, simulation, and experimental studies, as well as comprehensive review and survey papers.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
