

## Special Issue

# Natural Language Processing Method: Deep Learning and Deep Semantics

### Message from the Guest Editors

With the rapid development of deep learning technology, intelligent cross-modal systems have garnered a great deal of interest from academics and industry alike. Accordingly, we have witnessed the recent dramatic emergence of various AI-based vision-language applications in various fields. This Special Issue invites original research addressing important, innovative and timely challenges in the community. Potential topics include, but are not limited to:

- visual captioning (image, video)
- visual question answering (image, video)
- visual text retrieval (image, video)
- storytelling; dense visual captioning
- visual dialog (image, video)
- visual grounding
- scene graph generation

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
