Distributed Intelligence Technologies for Smart Cities of the Future

Message from the Guest Editors

This Special Issue of *Electronics* is devoted to providing a high-quality platform for sharing new findings in this area. This Special Issue seeks authors who wish to present novel technologies and their latest achievements in advanced distributed intelligence technologies designed for smart city environments. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Federated learning for smart cities;
- Mobile edge computing for smart cities;
- Internet of Things (IoT) advances for smart cities;
- Distributed AI and smart cities;
- Fusion of 6G, ML and MEC for next-generation cities;
- Intelligent Internet of Vehicles (IoV);
- Smart metering techniques.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.
