

## Special Issue

# Analog Circuits and Analog Computing

### Message from the Guest Editor

Analog circuits inherently demonstrate immense computing parallelism, which endows analog computing with fast speed and low computational complexity. It is highly promising that analog computing in modern times will be substantially different from its past versions. The aim of this Special Issue is to attract reviews and original research outcomes related to the design of analog circuits and their applications to analog computing. The topics of interest for this Special Issue include but are not limited to:

- CMOS analog circuits for solving differential equations or linear algebraic problems;
- CMOS analog circuits for neuromorphic computing and engineering;
- Analog computing with emerging resistive memory for implementing logic gates, performing matrix operations, or emulating synapse/neuron functions;
- In-memory computing using analog physical laws, with SRAM, DRAM, or nonvolatile resistive memory devices;
- Addressing noise and accuracy issues of analog computing;
- Analog–digital hybrid architectures for high-precision analog computing.

### Guest Editor

Prof. Dr. Zhong Sun

1. Institute for Artificial Intelligence, Peking University, Beijing 100871, China
2. School of Integrated Circuits, Peking University, Beijing 100871, China

### Deadline for manuscript submissions

closed (15 June 2025)

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
