# Special Issue

# Deep Learning-Based Object Detection/Classification

## Message from the Guest Editor

Object detection and classification are two important tasks in computer vision, and their algorithm, architecture, system and application scope are very wide. Here are some common application scenarios:

- Algorithm: Object detection and classification algorithms are used to identify and classify objects in images or videos.
- Architecture: Object detection and classification architecture mainly refers to the computer system used to process images or videos.
- System: Object detection and classification systems can be applied to many fields. For example, human–computer interaction systems can detect and classify human actions and other behaviors in images or videos; autonomous driving systems can detect and classify the objects in the road.
- Application: Object detection and classification applications are very extensive, including but not limited to human–computer interaction, security monitoring, manufacturing and other fields.

In short, object detection and classification have broad application prospects in many fields of computer vision technology, which can help people better understand the visual world.

# About the Journal

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Editor-in-Chief

Prof. Dr. Flavio Canavero
Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

## Author Benefits

**High Visibility:**

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

**Journal Rank:**

JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)

**Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
