Special Issue

Advanced Antenna Design for 5G, 6G and IoT Communications

Message from the Guest Editor

This Special Issue aims to publish a collection of novel, innovative and cutting-edge recent research articles on antenna design and optimization, related signal processing techniques, applications of machine learning methods in antennas design, RF energy harvesting and RF front-end design studies for 5G, 6G and future IoT systems. Novel research articles and comprehensive review manuscripts on the state-of-the-art antenna techniques are welcomed. The research topics of this Special Issue include, but are not limited to, the following:

- Antenna design for IoT devices;
- Novel antenna techniques;
- Machine learning and deep learning for antenna systems;
- Antennas design and optimization;
- High-efficiency antennas;
- Antenna and energy harvesting design;
- Impedance matching techniques;
- Circuit design for antennas;
- MIMO and massive MIMO techniques;
- Intelligent reflective surfaces;
- Computational electromagnetic for antennas;
- Antenna arrays;
- Beamforming techniques;
- Miniaturization of antennas;
- THz and mm-wave antennas;
- Antenna design for 5G and 6G networks;
- Antennas design for mobile devices.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero
Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
