

## Special Issue

# Antenna and Propagation Technologies for 5G/6G Communication

### Message from the Guest Editor

Antenna and propagation technologies are the backbone of 5G/6G communication, which will play a pivotal role in shaping the future of wireless networks. Antennas act as conduits for data transmission, requiring advanced designs like MIMO systems and beamforming to meet the escalating demands of increased bandwidth and energy efficiency in the 5G and emerging 6G landscape. These technologies enable higher data rates and lower latency, essential for applications ranging from augmented reality to the IoT.

In parallel, propagation technologies govern the ways in which electromagnetic waves traverse different mediums, impacting signal coverage and reliability. With the advent of 5G and the impending launch of 6G, addressing challenges such as higher frequencies and diverse deployment scenarios will necessitate innovative propagation techniques like beam steering and dynamic spectrum sharing. The integration of these advancements optimizes signal propagation and mitigates interference, ensuring the efficient functioning of next-generation networks.

As 5G evolves and 6G looms on the horizon, the seamless synergy between antenna and propagation technologies remains instrumental.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
