

## Special Issue

# Applications of Bioinspired Neural Network

### Message from the Guest Editors

Neural networks based on computational and engineering approaches have been successfully applied to a wide variety of fields. Academia generally takes it for granted that the findings in neural networks have greatly promoted the development of artificial intelligence. Research that focuses on interdisciplinary fields includes areas like artificial intelligence, computer vision, perception, pattern recognition, brain models, and neural computing. Neural networks are models that can be merged with other ideas and concepts. In particular, improvements in bioinspired concepts are expected to improve the possibilities of neural networks. Thus, more and more attention has been paid to research progress in neural networks and their potential applications in many fields. Topics of interest include but are not limited to the following:

- Speech recognition system using the human hearing system;
- Modeling the relationship between the human gaze and perception;
- Recognition system using the immune network system and neural networks.

Welcome to contribute!

---

### Guest Editors

Prof. Dr. Hiroki Tamura

Department of Environmental Robotics, Faculty of Engineering,  
University of Miyazaki, Miyazaki, Japan

Prof. Dr. Tang Zheng

Faculty of Engineering, Department of Intellectual Information  
Engineering, University of Toyama, Toyama, Japan

---

### Deadline for manuscript submissions

closed (31 July 2020)

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di  
Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and  
Systems Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.4 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the second half of 2024).
