

## Special Issue

# Blockchain Technology and Its Applications

### Message from the Guest Editor

Blockchain is a technology capable of creating new values in various fields, but there are still many technical barriers to be solved, and it is time to discover more application services that blockchain can be applied to. This Special Issue focuses on technical issues that need to be overcome to activate blockchain, and various application services that can be applied to blockchain.

- Efficiency of blockchain
- Scalability of blockchain
- Security in blockchain
- Blockchain platforms
- Blockchain technologies for media and content
- Blockchain technologies for healthcare applications
- Blockchain technologies for public services
- Emerging applications combined with blockchain
- Other technical issues to combine blockchain with emerging applications

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (Electrical and  
Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.4 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the second half of 2024).
