

## Special Issue

# New Trends and Methods in Communication Systems

### Message from the Guest Editors

The topics covered in this Special Issue include but are not limited to the latest developments in the field of advanced signal processing methods, radio communication technologies, electronic systems, non-linear system analysis, artificial intelligence, wireless communications, and the Internet of Things. We kindly invite experimentalists and theorists to submit their high-quality manuscript for publication in this Special Issue. The topics covered in this Special Issue include but are not limited to:

- communication systems
- signal processing
- electronic systems
- radio communication technologies
- non-linear system analysis
- artificial intelligence
- wireless communications and the Internet of Things

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
