In this Special Issue, we are interested in high-quality submissions that mainly highlight emerging cooperative approaches for future wireless networks. Topics of interest include but are not limited to the following:

- Interference coordination schemes;
- Cell-free massive MIMO system;
- Massive MIMO and millimeter-wave communication in the context of cooperative networks;
- Multicell cooperation (centralized joint processing, distributed processing, etc.);
- Cooperative interference alignment approaches;
- Relay assisted schemes;
- Cooperative physical layer security;
- Cooperative non-orthogonal multiple access schemes.
