# Special Issue

## Deep Learning for Next-Generation Wireless Networks

### Message from the Guest Editors

Deep learning (DL), including deep supervised learning, deep unsupervised learning, and deep reinforcement learning, has been a key enabler in future wireless networks, including 5G and beyond (B5G) networks. In this Special Issue, we solicit original, high-quality papers in the field of DL-driven B5Gs, potential topics may include but are not limited to: 

DL solutions for medium access control layer functionality, including resource allocation, user association, mobility management, etc. DL for core network management in B5Gs, including network slicing, virtualization, service deployment/migration, etc. \( \times DL \) for emerging scenarios in B5Gs, including EURLLC, mMTC, UAV, IIoT, JCS, etc. DL for fog/edge/cloud computing in B5Gs. Alpowered energy-efficient network orchestration. Security and privacy for DL-driven wireless communications. \( \text{Testbed. experimental evaluations.} \) and real-world applications of DL techniques in wireless communications.

### **Guest Editors**

Dr. Bouziane Brik

DRIVE Laboratory, Bourgogne University, Nevers, France

Dr. Junaid Ahmed Khan

Department of Electrical and Computer Engineering, Western Washington University, Bellingham, WA 9822, USA

Prof. Dr. Guangjie Han

Department of Information and Communication Engineering, Hohai University, Nanjing, China

### Deadline for manuscript submissions

closed (31 July 2023)

## **About the Journal**

### Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

#### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
