Electronics for Agriculture

Message from the Collection Editors

Electronics plays an important role in all fields, especially during the wave of the fourth industrial revolution (Industry 4.0). For example, ubiquitous sensing can be achieved through remote sensing, wireless sensor networks, drone swarm, and crowdsensing. Ubiquitous computing in any device, in any location, and in any format comes true with the help of embedded computing, edge/fog computing, and cloud computing. Benefitting from artificial intelligence and big data technologies, ubiquitous intelligence makes the world smarter.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.
