

## Special Issue

# Electromagnetic Interference and Compatibility

### Message from the Guest Editor

Emerging Internet of Things (IoT), smart grid, and transport electrification applications, along with the advances of semiconductor technology, which enables faster switching devices for highly efficient power conversion, are bringing about new EMC challenges that need to be addressed through the whole design flow of electric and electronic systems, starting from the highest levels of abstraction down to the physical level. In this Special Issue, contributions addressing electromagnetic compatibility and interference topics in the broadest sense, including but not limited to **IC- and system-level immunity and susceptibility issues of either information and communication technology (ICT) and power electronic systems, either in emerging IoT, smart grid, electric vehicles applications or in more traditional systems, EMC-oriented simulation and measurement techniques, and EMC applications of ML and AI**, are welcome and encouraged.

### Guest Editor

Dr. Paolo Stefano Crovetto

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Turin, Italy

### Deadline for manuscript submissions

closed (30 October 2020)

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and  
Systems Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.4 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the second half of 2024).
