

## Special Issue

# Advances in Electrical Capacitance Tomography System

### Message from the Guest Editors

This special issue intends to highlight the research that supports the development of the theories and technologies underlying the design of ECT systems. Both theoretical contributions and practical validations are essential. Topics of interest include, but are not limited to:

- 2D and 3D capacitance sensor design and modeling
- methods of capacitance measurement and signal conditioning
- complex-valued capacitance measurement and multi-modal imaging
- data acquisition system architecture for real-time imaging
- high-speed nonlinear image reconstruction
- image processing and process control
