

## Special Issue

# Electromagnetic Interference, Compatibility and Applications

### Message from the Guest Editors

The functionality of new generation electromagnetic devices, and especially electronic based systems (EBS), has vastly increased in the last decade while, at the same time, the operating frequencies have increased, and the dimensions have strongly decreased. Together—beside others—these facts lead to challenges in the system design, especially in terms of electromagnetic compatibility (EMC) issues. With the increased integration density of EBS, it has become more and more complicated to evaluate the EMC behavior of such devices in terms of measurement. Hence, the application of numerical methods in every design step is becoming increasingly important. Therefore, we propose a Special Issue entitled “Electromagnetic Interference, Compatibility and Applications”. The aim of this issue is to summarize the state-of-the-art approaches in the EMC-aware design of EBS, as well as to discuss the development of new numerical simulation methods for EMC.

### Guest Editors

Dr. Riccardo Torchio

Dipartimento di Ingegneria Industriale, Università degli Studi di Padova, 35131 Padova, Italy

Prof. Dr. Thomas Bauernfeind

Institute of Fundamentals and Theory in Electrical Engineering, Graz University of Technology, 8010 Graz, Austria

### Deadline for manuscript submissions

closed (31 October 2022)

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di  
Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
