

## Special Issue

# Real-Time Control of Embedded Systems

### Message from the Guest Editors

Embedded controllers have a wide variety of uses that vary from microcontrollers to consumer electronics, weapons to medical devices, and edge-level controllers to cloud-level control systems. Real-time control of embedded systems powered by artificial intelligence (AI) will revolutionize how we control environments including factories, workplaces, transportation systems, and power/water/gas grids. This Special Issue welcomes contributions on novel ideas related to embedded systems in various domains, such as Industrial Automation, Manufacturing, Robotics, Automotive, Appliance Automation, Healthcare, Wearable Systems, Energy Systems, Smart Grid and Smart Cities, including but not limited to the following topics:

- AI-powered real-time control for embedded systems;
- Modelling and simulation of real-time control for embedded systems;
- Sensing and perception of real-time controllers for embedded systems;
- Enhancing the energy efficiency of real-time control for embedded systems;
- Reliable and fault-tolerant real-time controllers for IoT devices;
- Lessons learned from the large-scale real-time control of embedded systems.

---

### Guest Editors

Prof. Dr. Deok-Hwan Kim

Department of Electronic Engineering, Inha University, Incheon 22212, Republic of Korea

Dr. Mehdi Pirahandeh

Department of Electronic Engineering, Inha University, Incheon 22212, Korea

---

### Deadline for manuscript submissions

closed (15 December 2023)

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
