

## Special Issue

# Smart Energy Storage Systems

### Message from the Guest Editors

Electric energy resources should move from conventional resources to other renewable and green resources that will usually need to be associated or coordinated with energy storage systems (ESS). New technologies, such as power electronics and information and communications technologies, allow controlling this ESS in new and optimized ways, to implement intelligent strategies that are able to optimize the operation of the conventional grid. These ESSs can be considered a key element of smart energy, called Smart Energy Storage Systems (SESS). In this Special Issue we call for original contributions related to SESS, covering the electronics, both power and communication electronic systems, required to assure their correct operation, monitoring and performance, to the computing systems required to implement intelligence, machine learning, learning capability and the establishment of new business models and smart contracts.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di  
Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
