

## Special Issue

# Explainability in Human-Computer Interaction and Collaboration

### Message from the Guest Editors

Explainability, also known as interpretability in some contexts, in human-computer interactions (HCIs) and collaborations refers to the ability of a computer system to provide users with information about their inner workings and why certain decisions were made.

It is an important aspect of HCI because it helps users trust and understand the behavior of AI systems, thereby increasing user satisfaction and improving decision making. In summary, the combination of explainability and HCI/C can help to improve the user satisfaction, trustworthiness, effectiveness, and efficiency of AI systems by designing them in a way that considers the human perspective and context while reducing errors and biases. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Explainability and explainable artificial intelligence;
- Human computer interaction;
- Human robot/agent collaboration;
- Human-centered AI;
- AI ethics;
- Decision-making systems;
- Recommender systems;
- Explainability in multiagent systems;
- Human robot teams.

We look forward to receiving your contributions.

---

### Guest Editors

Dr. Yazan Mualla

Dr. Amro Najjar

Dr. Igor Tchappi

Dr. Joris Hulstijn

Prof. Dr. Leon van der Torre

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
