Special Issue

Advanced High-Performance Integrated Circuits for Sensing Technologies and IoT Applications

Message from the Guest Editor

Today, sensing technologies and sensor-enabled devices are gaining attention, with a wide range of potential applications, ranging from internet of things (IoT), intelligent transportation systems (ITS) to personalized mobile healthcare. These tasks are mostly through wireless connections. Power dissipation, bandwidth efficiency, design flexibility, and scalability are important factors for these systems. However, there are still many challenges that must be addressed. Topics of interest for this Special Issue include, but are not limited to, the following areas:

- Ultra-low power wireless communication circuits enabling IoT applications
- High efficient load modulation techniques and backscattering solutions
- Energy harvesting and power management solutions for IoT devices
- Integrated circuits with wireless power transfer capability
- Ultra-low power sensor readout circuits and systems
- High-performance heterogeneous solutions for emerging technologies
- Multi-sensor miniaturized circuits and systems

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero
Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
