

## Special Issue

# Trends and Applications in Information Systems and Technologies

### Message from the Guest Editors

This Special Issue focuses on the main challenges in building and employing information systems: 1) developing innovative architecture, including computers, networks and software, to coordinate supply chains and help organizations become independent from their location; 2) analyzing large volumes of IoT, transactional and social data to support precise planning, forecasting and monitoring of the business; 3) identifying key applications of information systems and analytical platforms in practice. Computer science researchers are invited to contribute their original, unpublished works on this issue. Both research and review papers are welcome.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
