

## Special Issue

# Intelligent Modelling and Control in Renewable Energy Systems

### Message from the Guest Editors

In this Special Issue, potential topics include but are not limited to the following:

- Identification and modelling of renewable energy-sources and systems using artificial intelligence techniques.
- Design of intelligent controllers for renewable energy systems.
- Intelligent forecasting models for renewable resources.
- Intelligent control and management of renewable smart grids.
- Intelligent control and management of buildings with renewable energy systems.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and  
Systems Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.4 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the second half of 2024).
