

Special Issue

Advanced Multilevel Power Converters for Grid Integration of Renewable Energy Resources

Message from the Guest Editors

Power systems across the globe are experiencing an increased integration of renewable energy resources demanding the power system operators to explore and enforce new grid-forming and grid-supporting regulations and requirements to ensure the quality and reliability of the grid. Hence, renewable energy systems are required to be equipped with advanced features and control strategies to provide the required supporting functionalities to the grid such as power reserve control, frequency response, reactive power control, and so on. Given power electronic technologies will, therefore, be responsible for the control of power between most renewable sources, energy storage devices and the grid, they will play a key role in the upcoming grid-transformation process. Multilevel converters have become a standard for such applications as medium voltage drives, HVDC and FACTS, and are promising for the integration of renewable energy sources and energy storage systems. Therefore, this Special Issue focuses on advanced multilevel converters for the integration of renewable energy resources.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and
Systems Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.4 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the second half of 2024).
