

Special Issue

Novel Technologies on Image and Signal Processing

Message from the Guest Editor

This Special Issue aims to compile the best work in the area of “Novel technologies in signal & image processing” that underscore new methods for analysing complex images and signals, multimodality systems, classification, regression, and quantification. We invite submissions concerning the development of novel algorithms and technologies for image and signal processing. Survey papers and reviews are also welcome. Application areas include, but are not limited to:

- Healthcare—Imaging, Decision Support Systems, Homecare, Telehealth, etc.
- Sensors—Monitoring, wearables
- Modelling
- Smart living
- Biophotonics for medicine

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
