

Special Issue

Resource Sustainability for Energy and Electronics

Message from the Guest Editors

This SI aims to provide an excellent forum for scientists and engineers to share and exchange their latest contributions on resource sustainability for energy and electronics. Within this context, original articles as well as insightful review articles are expected. In order to have a better insight into/opportunity of achieving sustainable utilization of our limited resources, the development of new methods and/or the combination of multiple supplemental (and other) characterization methods for the utilization of complex/functional materials in energy-saving and consumer electronics is particularly welcome. Proper utilization of such complex materials is still a complicated and challenging task, since the material/element spatial heterogeneity and thus their process and/or resultant products/services might be varied with time. On the other hand, submissions that are relevant to many other areas of correlation between resources and energy/electronics are also highly appreciated. You can find some potential contribution topics under the “keywords”. We look forward to receiving your contributions, and to future collaborations.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
