

## Special Issue

# Security of Wireless Communications

### Message from the Guest Editors

Various aspects of the security of wireless communications are extremely important for the successful operation and widespread adoption of modern information technologies. Wireless communications have special requirements and vulnerabilities, and therefore are of special concern. In particular, wireless networks are vulnerable to malicious attacks and the number of potential threats has been increasing dramatically. Recently, considerable novel challenges have emerged in view of the rapid growth of advanced applications of wireless communications in commercial and industrial domains embracing Wireless Sensor Networks and the Internet of Things. In order to overcome these challenges, it is vitally important to develop a range of novel approaches as well as sophisticated combinations of useful and efficient security techniques. Relevant security measures include data encryption and device and user authentication. Privacy-preserving data mining is also essential for secure analysis of the big data pertaining to wireless communications.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
