Special Issue

Security of Wireless Communications

Message from the Guest Editors

Various aspects of the security of wireless communications are extremely important for the successful operation and widespread adoption of modern information technologies. Wireless communications have special requirements and vulnerabilities, and therefore are of special concern. In particular, wireless networks are vulnerable to malicious attacks and the number of potential threats has been increasing dramatically. Recently, considerable novel challenges have emerged in view of the rapid growth of advanced applications of wireless communications in commercial and industrial domains embracing Wireless Sensor Networks and the Internet of Things. In order to overcome these challenges, it is vitally important to develop a range of novel approaches as well as sophisticated combinations of useful and efficient security techniques. Relevant security measures include data encryption and device and user authentication. Privacy-preserving data mining is also essential for secure analysis of the big data pertaining to wireless communications.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to
appeal to a diverse audience of research scientists,
practitioners, and developers in academia and industry.
The journal is devoted to fast publication of latest
technological breakthroughs, cutting-edge
developments, and timely reviews of current and
emerging technologies related to the broad field of
electronics. Experimental and theoretical results are
published as regular peer-reviewed articles or as
articles within Special Issues guestedited by leading
experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero
Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:
JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
