Special Issue

Swarm Communication, Localization and Navigation

Message from the Guest Editors

Autonomous robotic swarms are an emerging concept envisioned for a variety of sensing applications in the field of space exploration, search and rescue, disaster management, and environmental monitoring. In a swarm system, a plethora of spatially separated autonomous agents regularly exchange information and coordinate to achieve a certain task in various environments, such as on the surface, in the air, in space or in the deep sea. Collaboration based on communication is key to increase the agent's situational awareness and navigation capability, which is essential for a high degree of autonomy. Despite the great potential of autonomous robotic swarms, navigation and joint system optimization is a challenging problem due to the high dimensionality of the network. Additionally, the interdisciplinary involvement of signal processing, communications, control, robotics, and artificial intelligence makes the design of a swarm system an exciting and timely relevant topic.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
