

## Special Issue

# The Technologies That Disappear: 30 Years after Mark Weiser's Vision

### Message from the Guest Editors

With this Special Issue, we aim to collect novel contributions from researchers and industry players in the field of the Ambient Intelligence with the goal of describing how electronic components have been adopted to design applications targeted at end-users. In particular, we look for hardware and software designs providing new services for users, in order to improve their life quality at home or, more generally, in places where users live and interact with others. Our focus is also on the use of commercial-wearable electronics that can be used for such applications, by providing evidence of a concrete implementation of the ubiquitous computing paradigm proposed the last decade of 90' years. Keywords:

- Ambient Intelligence (Aml) services
- IoT technologies for Aml services
- Wearable and portable electronics
- Consumer electronics and hardware design
- Ultra-low power machine learning at the edge
- Pilot sites and real-world deployment of Aml services
- Testbeds, applications, case studies
- Hardware and software architecture for edge computing and crowdsensing
- Tools for data fusion and analytics and their adoption
- Artificial Intelligence methods
- Cyberphysical systems

### Guest Editors

Dr. Michele Girolami

ISTI-CNR, Institute of Information Science and Technologies, 56124 Pisa, Italy

Dr. Davide La Rosa

ISTI-CNR, National Council of Research, Pisa, Italy

### Deadline for manuscript submissions

closed (31 December 2021)

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

---

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di  
Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
