

## Special Issue

# Applications of Thin Films in Microelectronics

### Message from the Guest Editor

The main aim of this Special Issue is to seek high-quality submissions that highlight emerging applications, materials synthesis, and the fabrication process, which address recent breakthroughs in the microelectronic system. The topics of interest include but are not limited to:

- Searching and investigating various types of applications of thin films in electronics;
- Advanced fabrication processes and characterizations;
- Research into new synthesis methods;
- Analysis of film behaviors;
- Robust and reliable novel geometrical designs in microelectronics

Welcome to contribute!

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
