

## Special Issue

# Intelligent Video Analytics

### Message from the Guest Editor

This Special Issue aims to encourage research in different aspects of intelligent video analytics. This area is largely open due to the difficulties in modeling multidimensional data, the challenges in extracting informative information, and also the computational overhead and lack of large and representative datasets in many application scenarios. The topics of this Special Issue include but are not limited to:

- Action recognition;
- Image/video segmentation;
- Object detection and tracking;
- Video synthesis;
- Self-supervised video understanding;
- Sequential data (e.g., skeleton sequence) modeling;
- Other topics related to intelligent video analytics.

Welcome to contribute!

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
