

## Special Issue

# Advances in Wireless Networks and Mobile Systems

### Message from the Guest Editors

The main areas of this Special Issue include but are not limited to wireless and mobile technologies, mobile software and services, wireless optical communications, cyberphysical systems, and e-health monitoring. These concepts fundamentally change the paradigms used in traditional networking, information systems, and information technology. Many other topics are included in the scope of WINSYS. This Special Issue also welcomes scholars to publish the extended versions of their papers from the "18th International Conference on Wireless Networks and Mobile Systems (WINSYS 2021)".

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in
