

Topical Collection

Encyclopedia of Digital Society, Industry 5.0 and Smart City

Message from the Collection Editors

Digital shapes, with increasing relevance and intensity, represent the most varied dimensions of human action; their consequent influence on the social and natural context that surrounds them also makes them a potentially relevant instrument in informing an increasingly sustainable society. They also raise profound challenges with the possibility of reproducing old inequalities and producing new ones at various levels (micro-, meso-, and macrosocial levels).

Encyclopedia of Digital Society, Industry 5.0 and Smart City intends to be an undeniable reference for collecting an entry collection covering diverse digital society and smart city fields, namely topics relating to the importance, relevance, and/or challenges raised by the digital dimension in the various contexts of activity, regardless of the scientific perspective adopted in an inter-, multi-, or transdisciplinary vision.

About the Journal

Message from the Editor-in-Chief

Many international journals have proliferated over the last 20 years regarding very specific themes of research. Thus, I am pleased to announce the new open-access MDPI journal *Encyclopedia* to provide a wide audience platform for the presentation of outcomes and methodological approaches of current interest for the scientific community. Social sciences, humanities, physical sciences, engineering, and life sciences are the principal macro-areas of relevance for the journal. On behalf of the Editorial Board, I welcome all to *Encyclopedia* and invite contributions of entry papers to our editorial project.

Editor-in-Chief

Prof. Dr. Raffaele Barretta

Department of Structures for Engineering and Architecture, University of Naples Federico II, 80125 Naples, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26.9 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in the first half of 2025).
