Encyclopedia of COVID-19

Message from the Collection Editor

Towards the end of 2019, a cluster of severe acute respiratory disease cases emerged in the region of Wuhan, China. Chinese scientists rapidly identified the etiological agent as a novel coronavirus, severe acute respiratory syndrome-coronavirus-2 (SARS-CoV-2). The virus rapidly spread around the world, infecting, disabling, and killing millions of people, placing immense strains on public health infrastructures, and resulting in untold economic damage. The exceptional threat of a deadly and debilitating new disease led to an extraordinary and unprecedented collaborative effort between the world's research, medical, publishing, and industrial communities. Encyclopedia of COVID-19 aims to provide a single source of reliable, comprehensive, and easily accessible information to chart this unparalleled progress. Contributions can be opinions and critiques, even controversial ones, as long as they are well argued and accompanied by factual evidence. All submissions will be peer-reviewed. For planned entry papers, we invite interested researchers to contact the publishers with titles and short definitions (about 100 words) to fit that brief.

About the Journal

Message from the Editor-in-Chief

Many international journals have proliferated over the last 20 years regarding very specific themes of research. Thus, I am pleased to announce the new open-access MDPI journal *Encyclopedia* to provide a wide audience platform for the presentation of outcomes and methodological approaches of current interest for the scientific community. Social sciences, humanities, physical sciences, engineering, and life sciences are the principal macro-areas of relevance for the journal. On behalf of the Editorial Board, I welcome all to *Encyclopedia* and invite contributions of entry papers to our editorial project.

Editor-in-Chief

Prof. Dr. Raffaele Barretta

Department of Structures for Engineering and Architecture, University of Naples Federico II, Via Claudio, 21-80125 Naples, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26.8 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in the second half of 2025).
