

Topical Collection

Encyclopedia of Hygiene

Message from the Collection Editors

This collection is designed to combine scientific publications into a single collection of knowledge on hygiene and the impact of the environment on human health. It covers topics such as environmental pollution, electric and magnetic field waves, high-humidity conditions, heat shocks, climate change, non-communicable and emerging diseases, corrosive environments, vacuums, strong vibration, high impact and electrical loading, high levels of ultrasound and infrasound exposure, microplastics, new aero and food allergens, excessive ionizing radiation, etc. The impact of the environment on human health is becoming increasingly apparent, and it is essential to understand the causes and consequences of this impact. This collection provides comprehensive insights into the mechanisms of the interaction of environmental factors with the human body and the role of preventive measures in maintaining public health. We invite researchers and physicians to submit original manuscripts on topics related to hygiene.

About the Journal

Message from the Editor-in-Chief

Many international journals have proliferated over the last 20 years regarding very specific themes of research. Thus, I am pleased to announce the new open-access MDPI journal *Encyclopedia* to provide a wide audience platform for the presentation of outcomes and methodological approaches of current interest for the scientific community. Social sciences, humanities, physical sciences, engineering, and life sciences are the principal macro-areas of relevance for the journal. On behalf of the Editorial Board, I welcome all to *Encyclopedia* and invite contributions of entry papers to our editorial project.

Editor-in-Chief

Prof. Dr. Raffaele Barretta

Department of Structures for Engineering and Architecture, University of Naples Federico II, Via Claudio, 21-80125 Naples, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26.8 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in the second half of 2025).
