New Advances in Low-Energy Processes for Geo-Energy Development

Guest Editors:

Dr. Daoyi Zhu

Prof. Dr. Yiqun Zhang

Dr. Xiankang Xin

Dr. Shuda Zhao

Dr. Hongbin Yang

Deadline for manuscript
submissions:

closed (15 June 2023)

Message from the Guest Editors

This Special Issue aims to present and disseminate the most recent advances related to the new advances in low-energy processes for geo-energy development.

Topics of interest for publication include, but are not limited to:

- Intelligent well technologies
- New technologies in ROP improvement
- New technologies in cold production
- New technologies in waterflooding for geo-energy resources development
- New technologies in polymer flooding
- New technologies in emulsion flooding
- New technologies in enhanced CO₂ injection
- New technologies in enhanced air injection
- New technologies in enhanced steam injection
- New technologies in heating geo-energy reservoirs
- New technologies in geo-energy reservoir simulation
- Low-energy processes for shale oil recovery
- Low-energy processes for tight oil recovery

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Engineering (miscellaneous)*)
