This Issue "Sustainable Production Special Environmentally Responsible Consumption" will explore ways we can contribute to sustainable consumption and production by reducing energy consumption and waste promoting sustainable energy and management, responsible purchasing decisions and energy-efficient production and supply chain operations and encouraging green energy innovations, eco-design and energy-efficient design and responsible lifestyle patterns. Both research and review papers are welcome. Keywords:

- sustainable management of energy
- green energy innovations
- sustainable operations and production frameworks
- sustainable transportation and supply chain
- energy production and consumption life cycle
- cutting energy waste practices
- energy consumption reporting
- responsible energy life-style patterns
- ecolabeling and energy labelling
- eco-design and energy-efficient design
- circular economy
- climate-neutral production and consumption

## Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
