Deadline for manuscript
submissions:

10 June 2021

Message from the Guest Editor

Dear Colleagues,

We would like to invite you to contribute to a Special Issue of *Energies* on “Advanced Device Engineering for Organic and Perovskite Solar Cells”. Recently, printable solar cells, such as organic solar cells (OSCs) and perovskite solar cells (PSCs) have emerged as a new class of next-generation power sources that provide unique features that may help to overcome conventional technical limits. In addition to the materials development, device engineering has been recognized as one of the most essential means of determining device performance, which involves the application of a broad spectrum of techniques drawn from the fields of chemistry, physics, materials science, and electronics.

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access:— free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, AGRIS, Inspec, CAPlus / SciFinder, and many other databases.

CiteScore (2019 Scopus data): 3.8; ranked 19/101 (Q2) in "Control and Optimization", 62/216 (Q2) in "Energy Engineering and Power Technology", 208/670 (Q2) in "Electrical and Electronic Engineering", 33/98 (Q2) in "Fuel Technology", 9/23 (Q2) in "Energy (miscellaneous)", and 72/179 (Q2) in "Renewable Energy, Sustainability and the Environment".
