

energies

an Open Access Journal by MDPI

The Artificial Intelligence Technologies for Electric Power Systems

Guest Editors:

Prof. Pedro NARDELLI

Cyber-physical systems group,
LUT University, Lappeenranta,
Finland

Prof. Dr. Yongheng Yang

College of Electrical Engineering,
Zhejiang University, Zheda Rd.
38, Hangzhou 310027, China

Deadline for manuscript
submissions:

closed (30 November 2021)

Message from the Guest Editors

This special issue is dedicated to the advances of AI techniques applied in this engineering domain. We expect contributions that apply recent advances of AI for tasks related to classification, detection, prediction, diagnosis, analytics, control, planning and management of processes in power systems.

- Artificial intelligence in power system
- Fault classification, detection, identification, prediction, and diagnosis
- AI-based demand-side management and flexibility
- Deep learning
- Cyber-physical energy systems
- Communications to support AI in power systems
- Cyber-security
- AI-based learning for system optimization

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and
Aerospace Engineering,
University of Roma Sapienza, Via
Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
