Deadline for manuscript  
submissions:  
**closed (10 August 2019)**

### Message from the Guest Editor

Dear Colleagues,

This Special Issue focuses on the use of Artificial Intelligence and Data Science methods for a better understanding of phenomena related to energy production and consumption and any kind of impact on environment and sustainability. Original contributions are welcomed but are not limited to renewable energies, global transnational studies, and spatiotemporal modelling, including all steps from the entire Data Science process such as pre-processing, postprocessing, or the relationship between decision support and data science results. Methodological contributions, real applications, or reviews exploring the current challenges in sustainability related to the state-of-the-art in energy and how Artificial Intelligence and Data Science can help are welcomed.

Prof. Dr. Karina Gibert

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded (Web of Science), Ei Compendex, Scopus and other databases.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 16.7 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2019).
