Message from the Guest Editors

Dear Colleagues,

Biosystems Engineering (BSE) aims to become the leading annual conference in the Baltic region in fields related to traditional and modern engineering techniques and technical solutions applied to biological systems. The goal of BSE 2020 is to gather scholars from all over the world to present advances in the fields of biosystems engineering, and to foster an environment conducive to exchanging ideas and information. This year, the conference will take place virtually on an e-platform. However, we still hope to provide an environment to develop new collaborations and meet experts on the fundamentals, applications, and products related to the mentioned fields.

Among the more prominent topics of the conference are energy and fuels from renewable sources, bioenergy, waste-to-energy, energy efficiency, etc.

Prof. Dr. Timo Kikas

Prof. Marcis Jansons

Guest Editors

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Room 32, Department of
Mechanical and Aerospace
Engineering, University of Roma
Sapienza, Via Eudossiana 18,

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access:—free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed by the Science Citation Index Expanded (Web of Science), Ei Compendex, Scopus and other databases.

CiteScore (2019 Scopus data): 3.8; ranked 19/101 (Q2) in "Control and Optimization", 62/216 (Q2) in "Energy Engineering and Power Technology", 208/670 (Q2) in "Electrical and Electronic Engineering", 33/98 (Q2) in "Fuel Technology", 9/23 (Q2) in "Energy (miscellaneous)", and 72/179 (Q2) in "Renewable Energy, Sustainability and the Environment".
