This Special Issue covers a broad range of topics:

- New insulation and building envelope materials;
- Building partitions (e.g., energy-efficient, with a thermal barrier, made of phase change materials);
- Advances in air, heat, and moisture modeling;
- Case studies of new building physics solution application;
- Interactions with the building's internal environment, inhabitants, materials, construction type, and systems applied;
- Innovative building's design solution and their energy performance;
- Innovations in renewable energy solutions;
- Hybrid renewable energy systems;
- Safety-related aspects of renewable energy;
- Advances in various renewable energy technologies (biomass, photovoltaic, solar thermal, wind energy, ocean energy, and hydro power technologies).

Deadline for manuscript  
submissions:

**closed (28 February 2023)**

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Engineering (miscellaneous)*)
