South Denmark, Denmark

Deadline for manuscript
submissions:

closed (30 April 2023)

Message from the Guest Editor

Dear Colleagues,

This Special Issue will deal with novel modeling and control techniques for power electronics converters and inverters. Topics of interest for publication include but are not limited to:

- Computer-based modeling of power converters;
- Advanced model of power electronics components;
- CAD Techniques;
- Advanced pulse width modulation of power converters;
- Novel and advanced control strategies and high bandwidth control loop design for power electronics converters;
- Coordinated control of parallel connected converters.

Prof. Dr. Ramkrishan Maheshwari

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
