Deadline for manuscript  
submissions:

**closed (1 May 2022)**

### Message from the Guest Editors

Dear Colleagues,

This special issue inquires about the submission of articles that will showcase the advancement of state-of-the-art Carnot batteries. Its topics and aims are intentionally kept broad to gather new solutions and ideas to meet techno-economic requirements for large-scale electricity storage demand, but also to underscore technical, economic, and social challenges surrounding these technologies. Submissions are encouraged but are not limited to the following general areas:

- Novel concepts and designs of Carnot batteries;
- Innovative solutions for the improvement of the existing Carnot batteries;
- Integration of renewable-based electricity to Carnot batteries;
- Techno-economic studies on large-scale and cost-efficient Carnot batteries;
- Energy and exergy efficiency analysis of Carnot batteries;
- Transient thermal performance of the heat engine and/or heat pump cycle;
- Carnot batteries-based trigeneration (electricity, heat, and cold) systems.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
